PROFILE

Applied Computer Technology graduate with professional experience in full-stack web development, working with React.js, JavaScript, Node.js, REST APIs, PostgreSQL, Git, Docker, and Linux-based deployment environments. Experienced in developing and maintaining web applications, dashboards, APIs, database-driven systems, GIS interfaces, and deployment environments. Strong problem-solving and critical-thinking skills, with hands-on experience contributing to real-world software projects in a professional development environment.

EXPERIENCE

JANUARY 2026 – PRESENT

Oakar Services Limited – Nairobi, Kenya

Junior Software Developer

- Develop and maintain React.js and Vite web applications, building responsive interfaces, dashboards, interactive visualizations and reusable components.
- Build and integrate REST APIs using Node.js and Express.js, connecting frontend functionality with backend services and databases.
- Work with PostgreSQL, Sequelize and PostGIS in database-driven applications, including database configuration, migrations and troubleshooting.
- Contribute to county government and organizational information systems, including public portals, administrative dashboards, GIS maps, indicators and data management features.
- Implement interactive GIS functionality using OpenLayers, supporting spatial data visualization and map-based interfaces.
- Configure and troubleshoot containerized application environments using Docker Compose, PostgreSQL, PgBouncer and Redis, alongside Linux, SSH, Nginx and PM2.
- Collaborate on version control, testing, debugging, documentation and deployment workflows using Git and GitHub.

EDUCATION

**United States International
University – Africa (USIU-Africa)**

Bachelor of Science in Applied Computer
Technology

2022 – 2026

Moi Girls' School, Nairobi

Kenya Certificate of Secondary
Education (KCSE)

2017 – 2021

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, PHP, SQL
- **Frontend:** React.js, Vite, HTML5, CSS3, Tailwind CSS, Material UI, Recharts
- **Backend:** Node.js, Express.js, REST APIs, Sequelize
- **Databases:** PostgreSQL, MySQL
- **DevOps & Deployment:** Git, GitHub, Docker, Docker Compose, Nginx, PM2, Linux/Ubuntu, SSH
- **GIS & Data Visualization:** OpenLayers, GIS data, interactive maps, Recharts
- **Development Tools:** Visual Studio Code, Cursor, Postman, pgAdmin

SELECTED PROJECTS

Personal Finance and Debt Management System

Independent Project | In Development

- React.js | Node.js | Express.js | PostgreSQL | REST APIs
- Developing a full-stack personal finance and debt management application to help users organize their finances, monitor expenses, manage budgets and track debt repayments.
- Designing a responsive financial dashboard for tracking income, expenses, budgets and outstanding debts.
- Developing backend services and REST APIs using Node.js and Express.js, with PostgreSQL for data persistence.
- Building financial management features, including transaction recording, budget monitoring and debt repayment tracking.
- Implementing data visualization and an intuitive React.js interface to present financial information.
